Overview

As described in [Chapter 2: Developing the PIRLS 2016 Context Questionnaires](#), many of the PIRLS 2016 context questionnaire items were developed to be combined into scales measuring a single underlying latent construct. For reporting, the scales were constructed using item response theory (IRT) scaling methods, specifically the Rasch partial credit model. As a parallel to the PIRLS International Benchmarks of achievement, each context scale allowed students to be classified into regions corresponding to high, middle, and low values on the construct. To facilitate interpretation of the regions, the cutpoints delimiting the regions were defined in terms of combinations of response categories. For certain scales that maintained many of the same items across PIRLS 2011 and PIRLS 2016, the scales were linked to allow for trend measurement on the background construct.

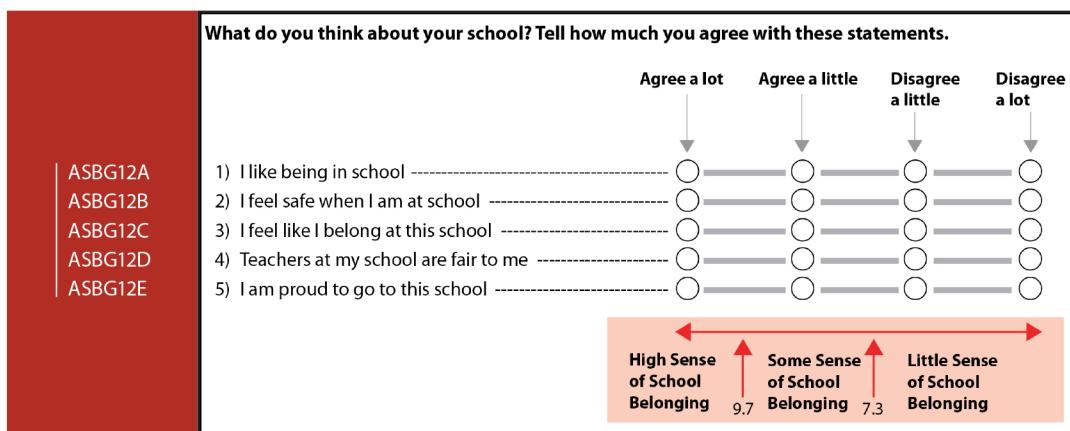

This chapter describes the procedures for constructing, interpreting, and validating scales based on responses to student, teacher, school, and home questionnaires for PIRLS and ePIRLS 2016, and then details the process for linking and reporting trend scales.

Reporting PIRLS 2016 Context Questionnaire Scales

As an example illustrating the PIRLS approach to reporting context questionnaire data, Exhibit 14.1 presents the PIRLS 2016 [*Sense of School Belonging*](#) scale. As the name suggests, this scale seeks to measure students' feelings towards their school and connectedness with the school community.

For each of the five statements, students were asked to indicate the degree of their agreement with the statement: agree a lot, agree a little, disagree a little, or disagree a lot. Using IRT partial credit scaling, the data from student responses were placed on a scale constructed so that the scale centerpoint of 10 was located at the mean score across all PIRLS countries. The units of the scale were chosen so that 2 scale score points corresponded to the logit standard deviation across all countries. Students with a **High Sense of School Belonging** had a scale score greater than or equal to the point (9.7) on the scale, corresponding to agreeing a lot, on average, with three of the five statements and agreeing a little with two of the statements. Students with **Little Sense of School Belonging** had a score no higher than the point (7.3) on the scale corresponding to disagreeing a little with three of the statements, on average, and agreeing a little with two of them.

Exhibit 14.1: Items in the PIRLS 2016 *Sense of School Belonging* Scale

Scaling Procedure

Partial credit IRT scaling is based on a statistical model that relates the probability that a person will choose a particular response to an item to that person's location on the underlying construct. In the PIRLS 2016 *Sense of School Belonging* scale, the underlying construct is students' feelings about their school, and students who agree in general with the five statements are assumed to have a greater sense of belonging, and students who disagree with the statements are assumed to feel less belonging.

The partial credit model (Masters, 1982) is shown below:

$$P_{x_i}(\theta_n) = \frac{e^{\sum_{j=0}^{x_i} [\theta_n - (\delta_i + \tau_{ij})]}}{\sum_{h=0}^{m_i} e^{\sum_{j=0}^h [\theta_n - (\delta_i + \tau_{ij})]}} \quad x_i = 0, 1, \dots, m_i \quad (14.1)$$

$P_{x_i}(\theta_n)$ denotes the probability that person n with location θ_n on the latent construct would choose response level x_i to item i out of the m_i possible response levels for the item. The item parameter δ_i gives the location of the item on the latent construct and τ_{ij} denotes step parameters for the response levels. For each scale, the scaling procedure involves first estimating the δ_i and τ_{ij} item parameters, and then using the model with these parameters to estimate θ_n , the score on the latent construct, for each of the n respondents. Depending on the scale, respondents may be students, parents, teachers, or school principals.

The PIRLS 2016 context questionnaire scaling was conducted using the ConQuest 2.0 software (Wu, Adams, Wilson, & Haldane, 2007).

In preparation for the context questionnaire scaling effort, the TIMSS & PIRLS International Study Center developed a system of production programs that could effectively calibrate the items on each scale using ConQuest and produce scale scores for each scale respondent. The PIRLS assessment population consisted of approximately 300,000 students, as well as their parents, teachers, and school principals. The estimation of the item parameters, a procedure also known as item calibration, was conducted on the combined data from all countries, with each country contributing equally to the calibration. This was achieved by assigning weights that sum to 500 for each country's student data. Exhibit 14.2 shows the international item parameters for the *Sense of School Belonging* scale. For each item, the delta parameter δ_i shows the estimated overall location of the item on the scale, and the tau parameters τ_{ij} show the location of the steps, expressed as deviations from delta. Also, included in the right column is the Rasch infit item statistic, which is a measure of how well the data matches the model, with values above 1.3 indicating unexpected response patterns. As can be seen in this exhibit, the data seemed to match the model well for the five items in the *Sense of School Belonging* scale.

Exhibit 14.2: Item Parameters for the PIRLS 2016 *Sense of School Belonging* Scale

Item	delta	tau_1	tau_2	tau_3	Infit
ASBG12A	0.35879	-0.45320	-0.71326	1.16646	1.03
ASBG12B	-0.05809	-0.47509	-0.46271	0.93780	1.02
ASBG12C	0.05363	-0.33690	-0.38143	0.71833	1.00
ASBG12D	-0.20416	-0.29014	-0.40311	0.69325	1.10
ASBG12E	-0.15017	-0.09998	-0.47379	0.57377	0.95

Once the calibration was completed and international item parameters were estimated, individual scores for each respondent (students, teachers, principals, or parents) were generated using weighted maximum likelihood estimation (Warm, 1989). All cases with valid responses to at least two items on a scale were included in the calibration and scoring processes.

The scale scores produced by the weighted likelihood estimation are in the logit metric with measured values ranging from approximately -5 to +5. To convert to a more convenient reporting metric, a linear transformation was applied to the international distribution of logit scores to place the data from student responses on a scale constructed so that the scale centerpoint of 10 was located at the mean logit score across all TIMSS countries and 2 scale score points corresponded to the standard deviation of the logit scores across all countries. Exhibit 14.3 presents the scale transformation constants applied to the international distribution of logit scores for the *Sense of School Belonging* scale to transform them to the (10, 2) reporting metric.

This scaling approach was followed for all scales, including most of the scales in [Chapter 3](#) of the *ePIRLS 2016 International Results in Online Informational Reading* report. The exception is the *Self-Efficacy for Computer Use* scale, the results for which are shown in [Exhibit 3.5](#) of the ePIRLS report. This scale was composed of items included in the short ePIRLS questionnaire and for this reason the scaling of *Self-Efficacy for Computer Use* was only based on data from ePIRLS countries.

Exhibit 14.3: Scale Transformation Constants for the PIRLS 2016 *Sense of School Belonging* Scale

Scale Transformation Constants

A = 7.558990

B = 1.566579

Transformed Scale Score = $7.558990 + 1.566579 \cdot \text{Logit Scale Score}$

To provide an approach to reporting the context questionnaire scales analogous to the PIRLS International Benchmarks for the PIRLS achievement scales, a method was developed to divide each scale into high, middle, and low regions and provide a content-referenced interpretation for these regions. For the PIRLS achievement scales, the Low, Intermediate, High, and Advanced International Benchmarks are specific reference points on the scale that can be used to monitor progress in student achievement. Using a [scale anchoring procedure](#), student performance at each Benchmark is described in terms of what students reaching that Benchmark know and can do. The percentage of students reaching each of these International Benchmarks can serve as a profile of student achievement in a country.

For the high, middle, and low regions of the context questionnaire scales, the interpretation is content-referenced to the extent that the boundaries of the regions were defined in terms of identifiable combinations of response categories. The particular response combinations that defined the regions boundaries, or cutpoints, were based on a judgment by PIRLS staff of what constituted a high or low region on each individual scale. For example, based on a consideration of the questions making up the *Sense of School Belonging* scale, it was determined that in order to be in the high region of the scale and labeled “High Sense of School Belonging,” a student would

have to agree a lot, on average, to at least three of the five statements and agree a little to the other two. Similarly, it was determined that a student who, on average, at most agreed a little with two of the statements and disagreed a little with the other three would be labeled to have “Little Sense of School Belonging.”

The scale region cutpoints were quantified by assigning a numeric value to each response category, such that each respondent’s responses to the scale’s questions could be expressed as a “raw score.” Assigning 0 to “Disagree a lot,” 1 to “Disagree a little,” 2 to “Agree a little,” and 3 to “Agree a lot,” results in raw scores on the *Sense of School Belonging* scale ranging from 0 (disagree a lot with all five statements) to 15 (agree a lot to all five). A student who agreed a lot with three statements and agreed a little with the other two would have a raw score of 13 ($3 \times 3 + 2 \times 2$). Following this approach, a student with a raw score of 13 or more would be in the “High Sense of School Belonging” region of the scale. Similarly, agreeing a little with two statements and disagreeing a little with three statements would result in a raw score of 7 ($2 \times 2 + 3 \times 1$), so that a student with a raw score less than or equal to 7 would be in the “Little Sense of School Belonging” region.

A property of a Rasch scale is that each raw score has a unique scale score associated with it. Exhibit 14.4 presents a raw score-scale score equivalence table for the *Sense of School Belonging* scale. From this table, it can be seen that a raw score of 7 corresponds to a scale score of 7.3 (rounding up) and a raw score of 13 corresponds to a scale score of 9.7 (rounding down).¹ These scale scores were the cutpoints used to divide the scale into the three regions.

Exhibit 14.4: Equivalence Table of Raw and Transformed Scale Scores for the PIRLS 2016 *Sense of School Belonging* Scale

Raw Score	Transformed Scale Score	Cutpoint
0	3.45100	
1	4.84737	
2	5.50192	
3	5.96197	
4	6.33045	
5	6.65432	
6	6.95548	
7	7.25277	7.3
8	7.54290	
9	7.85416	
10	8.19786	
11	8.59455	
12	9.08205	
13	9.73132	9.7
14	10.70304	
15	12.65139	

¹ The reason for rounding was to facilitate reporting, and it was decided that the highest cutpoint would be rounded down to ensure that those with an unrounded scale score (e.g., 9.73132 for the *Sense of School Belonging* scale) at the cutpoint were included within the highest region. For a similar reason, the lower cutpoint was rounded up.

Linking Procedures for Trend Context Questionnaire Scales

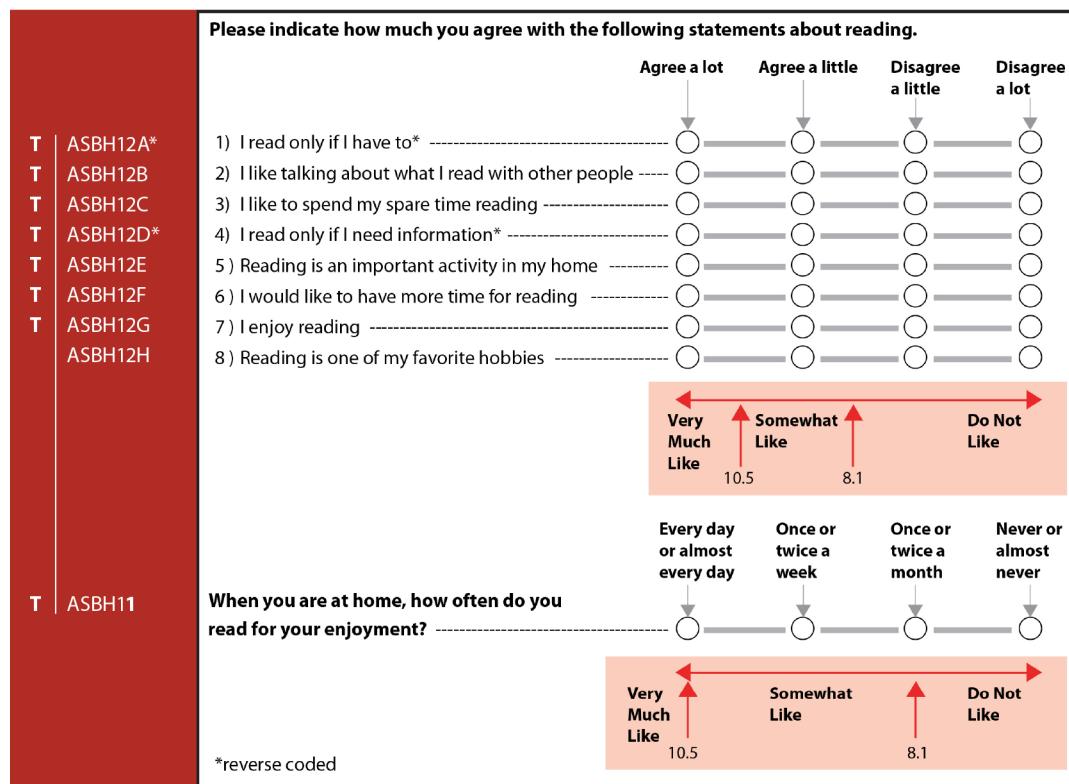

As a new initiative, trend results in the form of changes from 2011 to 2016 were reported for 8 PIRLS context questionnaire scales. For these trend scales, linking procedures were implemented to place the data from the two cycles on a common metric. This section describes the procedures for measuring trends—placing data for the PIRLS 2016 context questionnaire scales onto the PIRLS 2011 metric and validating this process.

As described in [Chapter 2](#), with each cycle of PIRLS, the questionnaires are revised to keep up with the times and to improve the measurement of the constructs. Using context questionnaire IRT scales to measure background constructs began with PIRLS 2011, and during the development phase of the PIRLS 2016 questionnaires, a conscious effort was made to increase the number of items contributing to each scale in order to enhance scale reliability and validity. The context scales used to measure trends in PIRLS 2016 have items common to both PIRLS 2011 and PIRLS 2016—also called trend items—and new items unique to PIRLS 2016.

Generally, a context questionnaire scale was considered for trend reporting in 2016 if it had a sufficient number of items in common with 2011: a minimum of five common items and more than half of the PIRLS 2016 items being common items. Before deciding to measure trend on these scales, staff at the TIMSS & PIRLS International Study Center conducted extensive analysis to examine item behavior in both cycles. For example, staff at the TIMSS & PIRLS International Study Center examined differences in parameter estimates across cycles (as shown in Exhibit 14.7). Trend was only reported on those scales that appeared to have similar measurement properties across the two cycles.

As an example, Exhibit 14.5 shows the PIRLS 2016 [*Parents Like Reading*](#) scale—one of the scales where trend measurement was reported. This scale measures how students' parents feel about reading, in terms of their level of agreement with eight statements about liking reading as well as how often they read for enjoyment. Statements expressing negative sentiment were reverse coded during the scaling. Eight of the nine items were common to the PIRLS 2011 and PIRLS 2016 versions of this scale, with "T" for trend identifying these items to the left of their variable name. One new statement was added to the eight common items to improve the measure of *Parents Like Reading* for PIRLS 2016.

Exhibit 14.5: Items in the PIRLS 2016 Parents Like Reading Trend Scale

T Trend item—item was included in the same scale in PIRLS 2011 and was used for linking the PIRLS 2011 and PIRLS 2016 scales.

The IRT calibration and scoring methods for trend scales were the same as those used for the new context scales. The data for these nine items were calibrated across all PIRLS 2016 countries using the Rasch partial credit model, and, through this calibration, item parameters were estimated on a logit scale that was unique to the 2016 cycle. Following calibration, weighted maximum likelihood estimation was used to derive Rasch logit scale scores based on these estimated item parameters for all countries and benchmarking participants, and as such student scores were placed on this 2016 logit metric. Although similar, the PIRLS 2016 logit metric is not identical to the PIRLS 2011 logit metric, and thus the PIRLS 2016 scores needed to be transformed to the 2011 metric to allow for trend reporting.

This linking was achieved through a two-step transformation process. The first transformation—with linear constants A_1 and B_1 —placed the PIRLS 2016 logit scale scores on the PIRLS 2011 logit metric, and the second transformation—with linear constants A_2 and B_2 —transformed the PIRLS 2011 logit metric to the PIRLS achievement scale, which uses the (10, 2) metric described earlier. To increase the efficiency of this transformation process and reduce rounding errors, both transformations were combined into one calculation using the equations below to create a set of final scale transformation constants, A and B :

$$B = B_2 \cdot B_1 \quad (14.2)$$

$$A = A_2 + B_2 \cdot A_1 \quad (14.3)$$

The first set of transformation parameters, A_1 and B_1 , were obtained by applying the mean/sigma method (Kolen & Brennan, 2004) to the two sets of common item parameters: one from the current calibration of PIRLS 2016 data and the other from the previous calibration of PIRLS 2011 data. The mean and standard deviation of the estimates of the difference between item location and item step parameter, $(\delta_i - \tau_{ij})$, were first found over all common items and all categories for each calibration. The transformation parameters A_1 and B_1 were calculated based on these two sets of means and standard deviations:

$$B_1 = \frac{SD_{c11}}{SD_{c16}} \quad (14.4)$$

$$A_1 = MN_{c11} - \frac{SD_{c11}}{SD_{c16}} \cdot MN_{c16} \quad (14.5)$$

where MN_{c16} and SD_{c16} are the mean and standard deviation of the estimates of $(\delta_i - \tau_{ij})$ of all common items and categories from the current calibration on PIRLS 2016 data; MN_{c11} and SD_{c11} are the mean and standard deviation of the estimates of $(\delta_i - \tau_{ij})$ of all common items and categories from the previous calibration on PIRLS 2011 data.

The second set of transformation parameters, A_2 and B_2 , were retrieved from the scale transformations which were established in 2011 for reporting. This transformation aimed to place the resulting Rasch scores on the PIRLS (10, 2) reporting scale.

Exhibit 14.6 presents the final trend scale transformation constants applied to the PIRLS 2016 international distribution of logit scale scores for the *Parents Like Reading* trend scale to transform them to the PIRLS (10, 2) trend reporting scale.

Exhibit 14.6: Scale Transformation Constants for the PIRLS 2016 *Parents Like Reading* Trend Scale

Scale Transformation Constants

A = 8.166833

B = 1.409138

Transformed Scale Score = 8.166833 + 1.409138 • Logit Scale Score

To assess the accuracy of the linking, item parameter estimates for the trend items were compared across the two cycles by examining the differences between the PIRLS 2016 item parameter estimates after being transformed to the PIRLS 2011 logit metric, and the PIRLS 2011 item parameter estimates on the 2011 logit scale. Exhibit 14.7 presents the differences between these estimates for the *Parents Like Reading* trend scale. As can be seen in the exhibit, the differences were at an acceptable level for both location and step parameters, with most deviations being less than 0.1.

Validating the PIRLS 2016 Context Questionnaire Scales

As evidence that the context questionnaire scales provide comparable measurement across countries, reliability coefficients were computed for each scale for every country and benchmarking participant, and a principal components analysis of the scale items was conducted. Exhibit 14.8 presents the results of this analysis for the *Parents Like Reading* scale. The Cronbach's Alpha reliability coefficients generally were at an acceptable level, with all above 0.7 and many at 0.9. The exhibit also shows the percentage of variance among the scale items accounted for by the first principal component in each country. In most cases this was acceptably high, indicating that the items could be adequately represented by a single scale. The component loadings of each questionnaire item from the principal components analysis are positive and substantial, indicating a strong correlation between each item and the scale in every country.

*Reverse coded

As indicators of effective environments for learning, a positive relationship with achievement is an important aspect of validity for the PIRLS context questionnaire scales. For the *Parents Like Reading* scale, Exhibit 14.9 presents the Pearson correlation with reading achievement in PIRLS 2016 for each country, together with r -squared—the proportion of variance in reading achievement attributable to the *Parents Like Reading* scale. These figures show a moderate relationship with achievement across participating countries. Also shown is the proportion of variance in achievement attributable to differences between the regions of the *Parents Like Reading* scale. This is very similar to the proportion of variance explained by the scale as a whole, indicating that dividing the scale into regions loses little of its power to account for achievement differences.

Item parameter estimates and item and scale statistics similar to those above are available in Appendix 14A for each of the PIRLS 2016 context questionnaire scales and in Appendix 14B for one context questionnaire scale based on responses to a brief questionnaire completed by students who participated in ePIRLS.

Reporting the PIRLS 2016 Trend Context Questionnaire Scales

Exhibit 14.10 shows an excerpt from the *Parents Like Reading* exhibit. To represent trends from 2011, the two columns to the right of the exhibit present the average scale score in 2016 for each country and the difference from the average in 2011, respectively. Up and down arrows indicate whether the trend difference is significantly higher or lower in 2016, with a 99% level of confidence.

Trend results were not reported for the percentage of students in each region. To facilitate interpretation of the region boundaries in terms of combinations of response categories, trend scales followed the same procedure as non-trend scales in setting cutpoints for classification into regions. As such, the procedure was primarily dependent on similarities in response patterns without taking into account variations in difficulty across the items that were unique to 2011 or 2016. Consequently, although the cutpoints generally are quite close across the two cycles, they are not identical and therefore it was considered most appropriate to use differences in scale score means rather than changes in the percentages in scale regions as indicators of trend.

Exhibit 14.10: Excerpt from the PIRLS 2016 *Parents Like Reading* Exhibit

Students Categorized by Parents' Reports

Students were scored on the *Parents Like Reading* scale according to their parents' responses to eight statements about reading as well as how often they read for enjoyment. Students whose parents **Very Much Like** reading had a score on the scale of at least 10.5, which corresponds to their parents "agreeing a lot" with four of the eight statements and "agreeing a little" with the other four, as well as reading for enjoyment "every day or almost every day," on average. Students whose parents **Do Not Like** reading had a score no higher than 8.1, which corresponds to their parents "disagreeing a little" with four of the eight statements and "agreeing a little" with the other four, as well as reading for enjoyment only "once or twice a month," on average. All other students had parents who **Somewhat Like** reading.

Appendix 14A: PIRLS 2016 Context Questionnaire Scales

Classroom Instruction Limited by Student Attributes Scale

The *Classroom Instruction Limited by Student Attributes* (SLI) scale was created based on teachers' responses concerning seven attributes of students described below.

Items in the PIRLS 2016 Classroom Instruction Limited by Student Attributes Scale

	<p>In your view, to what extent do the following limit how you teach this class?</p> <p style="text-align: center;"> Not at all <input type="radio"/> Some <input type="radio"/> A lot <input type="radio"/> </p> <p>1) Students lacking prerequisite knowledge or skills ----- <input type="radio"/></p> <p>2) Students suffering from lack of basic nutrition ----- <input type="radio"/></p> <p>3) Students suffering from not enough sleep ----- <input type="radio"/></p> <p>4) Students absent from class ----- <input type="radio"/></p> <p>5) Disruptive students ----- <input type="radio"/></p> <p>6) Uninterested students ----- <input type="radio"/></p> <p>7) Students with mental, emotional, or psychological impairment ----- <input type="radio"/></p> <p style="text-align: center;"> Very Little  Some A Lot 11.0 6.2 </p>

Could Do Early Literacy Tasks When Beginning Primary School Scale

The *Could Do Early Literacy Tasks When Beginning Primary School* (ELT) scale was created based on parents' responses to how well their children could do the tasks described below when they began primary school.

Items in the PIRLS 2016 *Could Do Early Literacy Tasks When Beginning Primary School* Scale

T Trend item—item was included in the same scale in PIRLS 2011 and was used for linking the PIRLS 2011 and PIRLS 2016 scales.

Item Parameters for the PIRLS 2016 Could Do Early Literacy Tasks When Beginning Primary School Scale

Item	delta	tau_1	tau_2	tau_3	Infit
ASBH07A	-1.92907	-2.74251	-0.22290	2.96541	1.23

Digital Devices in the Home Scale

The *Digital Devices in the Home* (DDH) scale was created based on parents' responses concerning the availability of three resources described below.

Items in the PIRLS 2016 *Digital Devices in the Home Scale*

1 Derived variable. For more details, see Supplement 3 of the [User Guide for the PIRLS 2016 International Database](#).

Item Parameters for the PIRLS 2016 *Digital Devices in the Home* Scale

Item	delta	tau_1	tau_2	tau_3	tau_4	Infit
ASDG05D	-1.01084	0.19104	-0.19104			0.97
ASBH16	0.78901	-2.55418	-0.25050	0.94345	1.86123	1.01
ASDH15	0.22183	0.40387	-0.40387			1.04

Scale Transformation Constants for the PIRLS 2016 *Digital Devices in the Home* Scale

Scale Transformation Constants

A = 8.607915

Transformed Scale Score = $8.607915 + 1.618512 \cdot \text{Logit Scale Score}$

B = 1.618512

Equivalence Table of the Raw Score and Transformed Scale Scores for the PIRLS 2016 *Digital Devices in the Home* Scale

Raw Score	Transformed Scale Score	Cutpoint
0	3.92341	
1	5.90375	6.0

Early Literacy Activities Before Beginning Primary School Scale

The *Early Literacy Activities Before Beginning Primary School* (ELA) scale was created based on parents' frequency of doing the nine activities described below.

Items in the PIRLS 2016 Early Literacy Activities Before Beginning Primary School Scale

		Before your child began primary/elementary school, how often did you or someone else in your home do the following activities with him or her?		
		Often	Sometimes	Never or almost never
T	ASBH02A	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
T	ASBH02B	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
T	ASBH02C	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
T	ASBH02D	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
T	ASBH02E	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
T	ASBH02F	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
T	ASBH02G	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
T	ASBH02H	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
T	ASBH02I	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Often Sometimes Never or Almost Never
 10.7 6.2

T Trend item—item was included in the same scale in PIRLS 2011 and was used for linking the PIRLS 2011 and PIRLS 2016 scales.

Item Parameters for the PIRLS 2016 Early Literacy Activities Before Beginning Primary School Scale

Item	delta	tau_1	tau_2	Infit

Home Resources for Learning Scale

The *Home Resources for Learning* (HRL) scale was created based on students' and parents' responses concerning the availability of five resources described below.

Items in the PIRLS 2016 *Home Resources for Learning* Scale

T Trend item—item was included in the same scale in PIRLS 2011 and was used for linking the PIRLS 2011 and PIRLS 2016 scales.

¹ Derived variable. For more details, see Supplement 3 of the [User Guide for the PIRLS 2016 International Database](#).

Item Parameters for the PIRLS 2016 Home Resources for Learning Scale

Item	delta	tau_1	tau_2	tau_3	tau_4	Infit

Instruction Affected by Digital Resource Shortages Scale

The *Instruction Affected by Digital Resource Shortages* (DRS) scale was created based on principals' responses concerning four school and classroom resources described below.

Items in the PIRLS 2016 *Instruction Affected by Digital Resource Shortages* Scale

ACBG12AF ACBG12AG ACBG12AH ACBG12BB	<p>How much is your school's capacity to provide instruction affected by a shortage or inadequacy of the following?</p> <p>A. General School Resources</p> <p>1) Technologically competent staff ----- <input type="radio"/> Not at all <input type="radio"/> A little <input type="radio"/> Some <input type="radio"/> A lot</p> <p>2) Audio-visual resources for delivery of instruction (e.g., interactive white boards, digital projectors) ----- <input type="radio"/> Not at all <input type="radio"/> A little <input type="radio"/> Some <input type="radio"/> A lot</p> <p>3) Computer technology for teaching and learning (e.g., computers or tablets for student use) ----- <input type="radio"/> Not at all <input type="radio"/> A little <input type="radio"/> Some <input type="radio"/> A lot</p> <p>B. Resources for Reading Instruction</p> <p>1) Computer software/applications for reading instruction ----- <input type="radio"/> Not at all <input type="radio"/> A little <input type="radio"/> Some <input type="radio"/> A lot</p>

Instruction Affected by Reading Resource Shortages Scale

The *Instruction Affected by Reading Resource Shortages* (RRS) scale was created based on principals' responses concerning 12 school and classroom resources described below.

Items in the PIRLS 2016 *Instruction Affected by Reading Resource Shortages* Scale

	<p>How much is your school's capacity to provide instruction affected by a shortage or inadequacy of the following?</p> <p>A. General School Resources</p> <p>T ACBG12AA T ACBG12AB T ACBG12AC T ACBG12AD T ACBG12AE T ACBG12AF ACBG12AG ACBG12AH</p> <p>1) Instructional materials (e.g., textbooks) ----- 2) Supplies (e.g., papers, pencils, materials) ----- 3) School buildings and grounds ----- 4) Heating/cooling and lighting systems ----- 5) Instructional space (e.g., classrooms) ----- 6) Technologically competent staff ----- 7) Audio-visual resources for delivery of instruction (e.g., interactive white boards, digital projectors) ----- 8) Computer technology for teaching and learning (e.g., computers or tablets for student use) -----</p> <p>B. Resources for Reading Instruction</p> <p>T ACBG12BA T ACBG12BB ACBG12BC ACBG12BD</p> <p>1) Teachers with a specialization in reading ----- 2) Computer software/applications for reading instruction ----- 3) Library resources (books, ebooks, magazines, etc.) ----- 4) Instructional materials for reading (e.g., reading series, textbooks) -----</p>
--	---

T Trend item—item was included in the same scale in PIRLS 2011 and was used for linking the PIRLS 2011 and PIRLS 2016 scales.

Parents Like Reading Scale

The *Parents Like Reading* (PLR) scale was created based on parents' responses to the nine items listed below.

Items in the PIRLS 2016 *Parents Like Reading* Scale

Please indicate how much you agree with the following statements about reading.	
T ASBH12A*	Agree a lot <input type="radio"/> Agree a little <input type="radio"/> Disagree a little <input type="radio"/> Disagree a lot <input type="radio"/> 1) I read only if I have to* ----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> 2) I like talking about what I read with other people ----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> 3) I like to spend my spare time reading ----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> 4) I read only if I need information* ----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> 5) Reading is an important activity in my home ----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> 6) I would like to have more time for reading ----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> 7) I enjoy reading ----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> 8) Reading is one of my favorite hobbies ----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/>
T ASBH12B	
T ASBH12C	When you are at home, how often do you read for your enjoyment? ----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/>
T ASBH12D*	
T ASBH12E	
T ASBH12F	
T ASBH12G	
T ASBH12H	
T ASBH11	

T Trend item—item was included in the same scale in PIRLS 2011 and was used for linking the PIRLS 2011 and PIRLS 2016 scales.

Parents' Perceptions of Their Child's School Scale

The *Parents' Perceptions of Their Child's School* (PCS) scale was created based on parents' responses to the six statements described below.

Items in the PIRLS 2016 *Parents' Perceptions of Their Child's School* Scale¹

What do you think of your child's school?	
ASBH09A ASBH09B ASBH09C ASBH09D ASBH09E ASBH09F	<div style="text-align: right; margin-bottom: 10px;"> Agree a lot Agree a little Disagree a little Disagree a lot </div> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;"> 1) My child's school does a good job including me in my child's education ----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> </div> <div style="text-align: center;"> 2) My child's school provides a safe environment ----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> </div> <div style="text-align: center;"> 3) My child's school cares about my child's progress in school ----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> </div> <div style="text-align: center;"> 4) My child's school does a good job informing me of his/her progress----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> </div> <div style="text-align: center;"> 5) My child's school promotes high academic standards ----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> </div> <div style="text-align: center;"> 6) My child's school does a good job in helping him/her become better in reading ----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> </div> </div> <div style="text-align: center; background-color: #FFB6C1; padding: 10px; margin-top: 10px;">  <p style="margin: 0;">←</p> <p style="margin: 0; font-weight: bold;">Very Satisfied</p> <p style="margin: 0;">9.5</p> <p style="margin: 0;">Somewhat Satisfied</p> <p style="margin: 0;">6.3</p> <p style="margin: 0;">Less than Satisfied</p> <p style="margin: 0;">→</p> </div>

¹ For the purpose of scaling, categories in which there were very few respondents were combined. The categories "Disagree a little" and "Disagree a lot" were combined for all variables. The scale statistics that are reported herein reflect analysis of the items following collapsing.

School Discipline Scale

The *School Discipline* (DAS) scale was created based on principals' responses concerning the ten potential school problems described below.

Items in the PIRLS 2016 *School Discipline* Scale

		To what degree is each of the following a problem among fourth grade students in your school?			
		Not a problem	Minor problem	Moderate problem	Serious problem
T	ACBG14A	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
T	ACBG14B	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
T	ACBG14C	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
T	ACBG14D	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
T	ACBG14E	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
T	ACBG14F	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
T	ACBG14G	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
T	ACBG14H	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
T	ACBG14I	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
T	ACBG14J	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

T Trend item—item was included in the same scale in PIRLS 2011 and was used for linking the PIRLS 2011 and PIRLS 2016 scales.

Item Parameters for the PIRLS 2016 School Discipline Scale

Item	delta	tau_1	tau_2	tau_3	Infit

School Emphasis on Academic Success – Principals’ Reports Scale

The *School Emphasis on Academic Success – Principals’ Reports* (EAS) scale was created based on principals’ responses characterizing the 12 aspects of school climate described below.

Items in the PIRLS 2016 *School Emphasis on Academic Success – Principals’ Reports Scale*¹

¹ For the purpose of scaling, categories in which there were very few respondents were combined. The categories “Low” and “Very low” were combined for all variables. The scale statistics that are reported herein reflect analysis of the items following collapsing.

Item Parameters for the PIRLS 2016 School Emphasis on Academic Success - Principals' Reports Scale

Item	delta	tau_1	tau_2	tau_3	Infit

School Emphasis on Academic Success – Teachers’ Reports Scale

The *School Emphasis on Academic Success – Teachers’ Reports* (EAS) scale was created based on teachers’ responses characterizing the 12 aspects of school climate described below.

Items in the PIRLS 2016 *School Emphasis on Academic Success – Teachers’ Reports Scale*¹

¹ For the purpose of scaling, categories in which there were very few respondents were combined. The categories “Low” and “Very low” were combined for all variables. The scale statistics that are reported herein reflect analysis of the items following collapsing.

Item Parameters for the PIRLS 2016 School Emphasis on Academic Success - Teachers' Reports Scale

Schools Where Students Enter the Primary Grades with Early Literacy Skills Scale

The *Schools Where Students Enter the Primary Grades with Early Literacy Skills* (ELS) scale was created based on principals' responses about the percentage of children in the school who began first grade with the six key skills described below.

Items in the PIRLS 2016 Schools Where Students Enter the Primary Grades with Early Literacy Skills Scale

T Trend item—item was included in the same scale in PIRLS 2011 and was used for linking the PIRLS 2011 and PIRLS 2016 scales.

Item Parameters for the PIRLS 2016 Schools Where Students Enter the Primary Grades with Early Literacy Skills Scale

Item	delta	tau_1	tau_2	tau_3	Infit

Students Confident in Reading Scale

The *Students Confident in Reading* (SCR) scale was created based on students' degree of agreement with the six statements described below.

Items in the PIRLS 2016 *Students Confident in Reading* Scale

ASBR07A ASBR07B ASBR07C* ASBR07D* ASBR07E* ASBR07F*	<p>How well do you read? Tell how much you agree with each of these statements.</p> <p style="text-align: center;">Agree a lot Agree a little Disagree a little Disagree a lot</p> <p>1) I usually do well in reading ----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/></p> <p>2) Reading is easy for me ----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/></p> <p>3) I have trouble reading stories with difficult words* ----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/></p> <p>4) Reading is harder for me than for many of my classmates* ----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/></p> <p>5) Reading is harder for me than any other subject* ----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/></p> <p>6) I am just not good at reading* ----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/></p> <p style="text-align: center;">* Reverse coded</p> <div style="text-align: center; background-color: #FFB6C1; padding: 10px; margin-top: 10px;">  <p>Very Confident Somewhat Confident Not Confident</p> <p>10.3 8.2</p> </div>

Students Engaged in Reading Lessons Scale

The *Students Engaged in Reading Lessons* (ERL) scale was created based on students' degree of agreement with the nine statements described below.

Items in the PIRLS 2016 *Students Engaged in Reading Lessons* Scale

How much do you agree with these statements about your reading lessons?	
	<input type="button" value="Agree a lot"/> <input type="button" value="Agree a little"/> <input type="button" value="Disagree a little"/> <input type="button" value="Disagree a lot"/>
ASBR01A	1) I like what I read about in school ----- <input type="radio"/>
ASBR01B	2) My teacher gives me interesting things to read----- <input type="radio"/>
ASBR01C	3) I know what my teacher expects me to do ----- <input type="radio"/>
ASBR01D	4) My teacher is easy to understand ----- <input type="radio"/>
ASBR01E	5) I am interested in what my teacher says ----- <input type="radio"/>
ASBR01F	6) My teacher encourages me to say what I think about what I have read ----- <input type="radio"/>
ASBR01G	7) My teacher lets me show what I have learned----- <input type="radio"/>
ASBR01H	8) My teacher does a variety of things to help us learn ----- <input type="radio"/>
ASBR01I	9) My teacher tells me how to do better when I make a mistake ----- <input type="radio"/>
 Very Engaged Somewhat Engaged Less than Engaged	
9.5 7.1	

Item Parameters for the PIRLS 2016 Students Engaged in Reading Lessons Scale

Item	delta	tau_1	tau_2	tau_3	Infit

Students Like Reading Scale

The *Students Like Reading* (SLR) scale was created based on students' responses to the ten items described below.

Items in the PIRLS 2016 *Students Like Reading* Scale

	<p>What do you think about reading? Tell how much you agree with each of these statements.</p> <p style="text-align: center;"> Agree a lot Agree a little Disagree a little Disagree a lot </p> <p>1) I like talking about what I read with other people ----- </p> <p>2) I would be happy if someone gave me a book as a present ----- </p> <p>3) I think reading is boring* ----- </p> <p>4) I would like to have more time for reading ----- </p> <p>5) I enjoy reading ----- </p> <p>6) I learn a lot from reading ----- </p> <p>7) I like to read things that make me think ----- </p> <p>8) I like it when a book helps me imagine other worlds ----- </p> <p>* Reverse coded</p> <div style="text-align: center; background-color: #ffccbc; padding: 10px;"> Very Much Like Reading Somewhat Like Reading Do Not Like Reading 10.3 8.3 </div> <p>How often do you do these things outside of school?</p> <p style="text-align: center;"> Every day or almost every day Once or twice a week Once or twice a month Never or almost never </p> <p>1) I read for fun ----- </p> <p>2) I read to find out about things I want to learn ----- </p> <div style="text-align: center; background-color: #ffccbc; padding: 10px;"> Very Much Like Reading Somewhat Like Reading Do Not Like Reading 10.3 8.3 </div>

Students' Sense of School Belonging Scale

The *Students' Sense of School Belonging* (SSB) scale was created based on students' degree of agreement with the five statements described below.

Items in the PIRLS 2016 *Students' Sense of School Belonging* Scale

ASBG12A ASBG12B ASBG12C ASBG12D ASBG12E	<p>What do you think about your school? Tell how much you agree with these statements.</p> <div style="text-align: center; margin-bottom: 10px;">  </div> <p>1) I like being in school ----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> 2) I feel safe when I am at school ----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> 3) I feel like I belong at this school ----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> 4) Teachers at my school are fair to me ----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> 5) I am proud to go to this school ----- <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/> <input type="radio"/></p> <div style="text-align: center; background-color: #FFB6C1; padding: 5px; margin-top: 10px;">  <p>High Sense of School Belonging 9.7 Some Sense of School Belonging 7.3 Little Sense of School Belonging</p> </div>

Teacher Job Satisfaction Scale

The *Teacher Job Satisfaction* (TJS) scale was created based on the degree that teachers responded positively to the five items below.

Items in the PIRLS 2016 Teacher Job Satisfaction Scale¹

¹ For the purpose of scaling, categories in which there were very few respondents were combined. The categories "Sometimes" and "Never or almost never" were combined for all variables. The scale statistics that are reported herein reflect analysis of the items following collapsing.

Item Parameters for the PIRLS 2016 Teacher Job Satisfaction Scale

**Cronbach's Alpha Reliability Coefficient and Principal Components Analysis
of the Items in the ePIRLS 2016 Self-Efficacy for Computer Use Scale**

Country	Cronbach's Alpha Reliability Coefficient	Percent of Variance Explained	Component Loadings for Each Item		
			ASBE03A	ASBE03B	ASBE03C
Canada	0.57	54	0.78	0.77	0.65
Chinese Taipei	0.66	60	0.77	0.79	0.76
Denmark	0.68	61	0.79	0.81	0.75
Georgia	0.51	52	0.78	0.61	0.77
Ireland	0.67	61	0.82	0.81	0.70
Israel	0.63	58	0.79	0.79	0.71
Italy	0.69	63	0.82	0.80	0.75
Norway (5)	0.66	60	0.81	0.79	0.72
Portugal	0.66	60	0.84	0.81	0.67
Singapore	0.64	59	0.81	0.78	0.69
Slovenia	0.68	62	0.83	0.79	0.74
Sweden	0.71	64	0.85	0.83	0.71
United Arab Emirates	0.57	54	0.76	0.75	0.69
United States	0.58	55	0.78	0.75	0.69
Benchmarking Participants					
Abu Dhabi, UAE	0.55	53	0.75	0.76	0.67
Dubai, UAE	0.58	54	0.76	0.77	0.68

Relationship Between the ePIRLS 2016 Self-Efficacy for Computer Use Scale and ePIRLS 2016 Online Informational Reading Achievement

Country	Pearson's Correlation with ePIRLS Achievement		Variance in ePIRLS Achievement Accounted for by Difference Between Regions of the Scale (η^2)
	(r)	(r^2)	
Canada	0.08	0.01	0.01
Chinese Taipei	0.08	0.01	0.01
Denmark	0.14	0.02	0.03
Georgia	0.14	0.02	0.02
Ireland	0.06	0.00	0.01
Israel	0.12	0.01	0.02
Italy	0.03	0.00	0.00
Norway (5)	0.12	0.01	0.02
Portugal	0.10	0.01	0.01
Singapore	0.10	0.01	0.01
Slovenia	0.06	0.00	0.00
Sweden	0.07	0.01	0.02
United Arab Emirates	0.16	0.03	0.03
United States	0.07	0.00	0.01
International Median	0.09	0.01	0.01
Benchmarking Participants			
Abu Dhabi, UAE	0.17	0.03	0.04
Dubai, UAE	0.14	0.02	0.02
