# Supplement 1: International Version of the TIMSS 2003 Background and Curriculum Questionnaires

---

## Overview

This supplement contains the international version of the TIMSS 2003 background questionnaires and curriculum questionnaires in the following 12 sections:

- Section 1: Eighth Grade - Student Questionnaire - General Science Version
- Section 2: Eighth Grade - Student Questionnaire - Separate Science Subjects Version
- Section 3: Eighth Grade - Mathematics Teacher Questionnaire
- Section 4: Eighth Grade - Science Teacher Questionnaire
- Section 5: Eighth Grade - School Questionnaire
- Section 6: Eighth Grade – Mathematics Curriculum Questionnaire
- Section 7: Eighth Grade – Science Curriculum Questionnaire
- Section 8: Fourth Grade - Student Questionnaire
- Section 9: Fourth Grade - Teacher Questionnaire
- Section 10: Fourth Grade - School Questionnaire
- Section 11: Fourth Grade – Mathematics Curriculum Questionnaire
- Section 12: Fourth Grade – Science Curriculum Questionnaire

It contains the lists of the questionnaire items that were administered. The international background variables corresponding to each of the questionnaire question are also given. However, the location of each of the curriculum questionnaire items is used as its corresponding variables. For the eighth grade student questionnaires, although there were two versions administered, only one list is presented where it is indicated whether the variables were included in the general science, the separate science subjects, or both questionnaires.

The questionnaires were designed to provide an opportunity for individual countries to make modifications to some questions or response options. This allowed countries to include the appropriate wording or options most consistent with their own national systems. In the international versions of the questionnaires, such questions contain instructions to the National

Research Coordinators (NRC) to substitute the appropriate wording for their country and/or to modify or delete any inappropriate questions or options. These instructions were indicated in two ways in the questionnaires by the text <NRC NOTE:> and <International Option>. When used it was an indicator that the NRC was to substitute, if necessary, an appropriate national option that would retain the same basic interpretation as the international version.

Because of the complex nature of the data collected with the open-ended items of the curriculum questionnaires (i.e. items that asked respondent to comment on a particular issue), these data are not available in the public release of the database. When this was the case, items are marked with an asterisk in the lists of the questionnaire variables.

The documentation of the national adaptations of the background questionnaire items is included in Supplement 2. This provides the user with information required to evaluate the availability of internationally comparable data for use in secondary analyses involving the TIMSS background variables.

The User Guide includes all the questionnaires administered as part of the TIMSS 2003 Assessment. The lists of variables given for each of the 2003 questionnaires indicate whether the question was also administered and available in the questionnaires administered in 1999. The availability of these variables in TIMSS 1995 can be found in the 1999 User Guide. The questionnaires included with this Supplement have each question with its corresponding variable name in the margin. The curriculum questionnaires have question locations in the margin. The international versions of the background questionnaires from the 1995 assessment are available with the User Guide for the 1995 Database.

In the lists of the questionnaire variables, for each variable, the corresponding international questionnaire location is given. The questionnaire item numbers associated with each variable are indicated by field locations according to the formats given in Table S1.1. The lists of background variables for the student, teacher, and school questionnaires and of curriculum questionnaire variables are presented in Tables S1.2 through S1.12.

TQ1-25C	ATBMTTME	No	By the end of this school year, approximately what percentage of teaching time will you have spent during this school year on measurement (includes recognizing units and using tools) for the <fourth-grade> students in the TIMSS class?
TQ1-25D	ATBMTTGE	No	By the end of this school year, approximately what percentage of teaching time will you have spent during this school year on geometry (includes two- and three-dimensional shapes) for the <fourth-grade> students in the TIMSS class?
TQ1-25E	ATBMTTDA	No	By the end of this school year, approximately what percentage of teaching time will you have spent during this school year on data (includes reading, making, and interpreting tables and graphs) for the <fourth-grade> students in the TIMSS class?
TQ1-25F	ATBMCOTH	No	By the end of this school year, approximately what percentage of teaching time will you have spent during this school year on other, please specify, for the <fourth-grade> students in the TIMSS class?
TQ1-26AA	ATBMTA01	No	When have students in the TIMSS class been taught whole numbers including place value and ordering?
TQ1-26AB	ATBMTA02	No	When have students in the TIMSS class been taught to represent whole numbers using words, diagrams, or symbols?
TQ1-26AC	ATBMTA03	No	When have students in the TIMSS class been taught properties of whole numbers such as odd and even, multiples, or factors?
TQ1-26AD	ATBMTA04	No	When have students in the TIMSS class been taught computation with whole numbers?
TQ1-26AE	ATBMTA05	No	When have students in the TIMSS class been taught estimation with whole numbers?
TQ1-26AF	ATBMTA06	No	When have students in the TIMSS class been taught fractions (parts of a whole or a collection, location on a number line)?
TQ1-26AG	ATBMTA07	No	When have students in the TIMSS class been taught equivalent fractions?
TQ1-26AH	ATBMTA08	No	When have students in the TIMSS class been taught to compare and order fractions?
TQ1-26AI	ATBMTA09	No	When have students in the TIMSS class been taught fractions or decimals represented by words, numbers, or models?
TQ1-26AJ	ATBMTA10	No	When have students in the TIMSS class been taught adding and subtracting fractions with the same denominator?
TQ1-26AK	ATBMTA11	No	When have students in the TIMSS class been taught adding and subtracting with decimals (tenths and/or hundredths)?
TQ1-26AL	ATBMTA12	No	When have students in the TIMSS class been taught simple proportional reasoning?
TQ1-26BA	ATBMTA13	No	When have students in the TIMSS class been taught patterns or numbers or shapes (extending sequences and finding missing terms)?

TQ1-26BB	ATBMTA14	No	When have students in the TIMSS class been taught equality using equations, areas, volumes, masses/weights?
TQ1-26BC	ATBMTA15	No	When have students in the TIMSS class been taught to find a missing number in an equation (e.g., if $17 + \underline{\hspace{1cm}} = 29$ , what number would go in the blank to make the equation true)?
TQ1-26BD	ATBMTA16	No	When have students in the TIMSS class been taught simple equations?
TQ1-26BE	ATBMTA17	No	When have students in the TIMSS class been taught pairs of numbers following a given rule (e.g., multiply the first number by 3 and add 2 to get the second number)?
TQ1-26BF	ATBMTA18	No	When have students in the TIMSS class been taught finding a rule for a relationship given some pairs of numbers?
TQ1-26CA	ATBMTA19	No	When have students in the TIMSS class been taught non-standard units to measure length, area, volume, and time (e.g., paper clips for length, tiles for area, sugar cubes for volume)?
TQ1-26CB	ATBMTA20	No	When have students in the TIMSS class been taught standard units to measure length, area, mass/weight, angle, and time (e.g., kilometers for car trips, centimeters for human height)?
TQ1-26CC	ATBMTA21	No	When have students in the TIMSS class been taught conversion factors between standard units (e.g., hours to minutes, grams to kilograms)?
TQ1-26CD	ATBMTA22	No	When have students in the TIMSS class been taught instruments to measure length, weight, time, and temperature in problem situations (e.g., rulers and scales)?
TQ1-26CE	ATBMTA23	No	When have students in the TIMSS class been taught how to calculate areas and perimeters of squares?
TQ1-26CF	ATBMTA24	No	When have students in the TIMSS class been taught how to estimate length, area, volume, weight, and time?
TQ1-26DA	ATBMTA25	No	When have students in the TIMSS class been taught angles greater than, equal to, or less than a right angle (or 90 degrees)?
TQ1-26DB	ATBMTA26	No	When have students in the TIMSS class been taught parallel and perpendicular lines?
TQ1-26DC	ATBMTA27	No	When have students in the TIMSS class been taught familiar two- and three-dimensional shapes and their properties?
TQ1-26DD	ATBMTA28	No	When have students in the TIMSS class been taught congruent triangles (i.e., same shape and size)?
TQ1-26DE	ATBMTA29	No	When have students in the TIMSS class been taught similar triangles (i.e., same shape and different size)?
TQ1-26DF	ATBMTA30	No	When have students in the TIMSS class been taught points in a plane?
TQ1-26DG	ATBMTA31	No	When have students in the TIMSS class been taught relationships between two-dimensional and three-dimensional shapes?
TQ1-26DH	ATBMTA32	No	When have students in the TIMSS class been taught informal coordinate systems?
TQ1-26DI	ATBMTA33	No	When have students in the TIMSS class been taught symmetry about a line?
TQ1-26DJ	ATBMTA34	No	When have students in the TIMSS class been taught two-dimensional symmetrical figures?
TQ1-26DK	ATBMTA35	No	When have students in the TIMSS class been taught translation, reflection, and rotation (<shifts, flips, and turns> of shapes)?

QOM1q12Da	QOM1q12Da	N/A	According to the national mathematics curriculum, what proportion of <grade 4> students should have been taught each of the following topics or skills by the end of <grade 4>? Geometry Angles greater than, equal to, or less than a right angle (or 90°)
QOM1q12Da_Grade	QOM1q12Da_Grade	N/A	Across grades K-12, at what grade(s) is the topic primarily intended to be taught?
QOM1q12Db	QOM1q12Db	N/A	According to the national mathematics curriculum, what proportion of <grade 4> students should have been taught each of the following topics or skills by the end of <grade 4>? Geometry Parallel and perpendicular lines
QOM1q12Db_Grade	QOM1q12Db_Grade	N/A	Across grades K-12, at what grade(s) is the topic primarily intended to be taught?
QOM1q12Dc	QOM1q12Dc	N/A	According to the national mathematics curriculum, what proportion of <grade 4> students should have been taught each of the following topics or skills by the end of <grade 4>? Geometry Familiar two- and three-dimensional shapes and their properties
QOM1q12Dc_Grade	QOM1q12Dc_Grade	N/A	Across grades K-12, at what grade(s) is the topic primarily intended to be taught?
QOM1q12Dd	QOM1q12Dd	N/A	According to the national mathematics curriculum, what proportion of <grade 4> students should have been taught each of the following topics or skills by the end of <grade 4>? Geometry Congruent triangles
QOM1q12Dd_Grade	QOM1q12Dd_Grade	N/A	Across grades K-12, at what grade(s) is the topic primarily intended to be taught?
QOM1q12De	QOM1q12De	N/A	According to the national mathematics curriculum, what proportion of <grade 4> students should have been taught each of the following topics or skills by the end of <grade 4>? Geometry Similar triangles
QOM1q12De_Grade	QOM1q12De_Grade	N/A	Across grades K-12, at what grade(s) is the topic primarily intended to be taught?
QOM1q12Df	QOM1q12Df	N/A	According to the national mathematics curriculum, what proportion of <grade 4> students should have been taught each of the following topics or skills by the end of <grade 4>? Geometry Points in a plane
QOM1q12Df_Grade	QOM1q12Df_Grade	N/A	Across grades K-12, at what grade(s) is the topic primarily intended to be taught?
QOM1q12Dg	QOM1q12Dg	N/A	According to the national mathematics curriculum, what proportion of <grade 4> students should have been taught each of the following topics or skills by the end of <grade 4>? Geometry Relationships between two-dimensional and three-dimensional shapes (nets)
QOM1q12Dg_Grade	QOM1q12Dg_Grade	N/A	Across grades K-12, at what grade(s) is the topic primarily intended to be taught?
QOM1q12Dh	QOM1q12Dh	N/A	According to the national mathematics curriculum, what proportion of <grade 4> students should have been taught each of the following topics or skills by the end of <grade 4>? Geometry Informal coordinate systems
QOM1q12Dh_Grade	QOM1q12Dh_Grade	N/A	Across grades K-12, at what grade(s) is the topic primarily intended to be taught?

## General Directions

In this booklet, you will find questions about yourself. Some questions ask for facts while other questions ask for your opinions.

Read each question carefully and respond as accurately as possible. You may ask for help if you do not understand something or are not sure how to respond.

Some of the questions will be followed by a few possible choices indicated with a circle with a number in it. For these questions, shade in the circle with the response of your choice as shown in Examples 1, 2, and 3.

### Example 1

Do you go to school?

Fill in **one** circle only

- Yes ..... ●  
No ..... ②

### Example 2

How often do you do these things?

Fill in **one** circle for each line

- |                                 | Every day | At least once a week | Once or twice a month | A few times a year | Never |
|---------------------------------|-----------|----------------------|-----------------------|--------------------|-------|
| a) I listen to music .....      | ↓         | ↓                    | ↓                     | ↓                  | ↓     |
|                                 | ①         | ②                    | ●                     | ④                  | ⑤     |
| b) I talk with my friends ..... | ●         | ②                    | ③                     | ④                  | ⑤     |
| c) I play sports .....          | ①         | ●                    | ③                     | ④                  | ⑤     |

**Example 3**

Indicate how much you agree with each of these statements.

Fill in **one** circle for each line

	Agree a lot	Agree a little	Disagree a little	Disagree a lot
a) Watching movies is fun .....	①	●	③	④
b) I like eating ice cream .....	●	②	③	④

Read each question carefully, and pick the answer you think is best. Fill in the circle next to or below your answer. If you decide to change your answer, erase your first answer and then fill in the circle next to or under your new answer. Ask for help if you do not understand something or are not sure how to answer.

Thank you for your time, effort, and thought in completing this questionnaire.

## General Directions

In this booklet, you will find questions about yourself. Some questions ask for facts while other questions ask for your opinions.

Read each question carefully and respond as accurately as possible. You may ask for help if you do not understand something or are not sure how to respond.

Some of the questions will be followed by a few possible choices indicated with a circle with a number in it. For these questions, shade in the circle with the response of your choice as shown in Examples 1, 2, and 3.

### Example 1

Do you go to school?

Fill in **one** circle only

Yes ..... ●

No ..... ②

### Example 2

How often do you do these things?

Fill in **one** circle for each line

- |                                 | Every day | At least once a week | Once or twice a month | A few times a year | Never |
|---------------------------------|-----------|----------------------|-----------------------|--------------------|-------|
| a) I listen to music .....      | ↓         | ↓                    | ↓                     | ↓                  | ↓     |
|                                 | ①         | ②                    | ●                     | ④                  | ⑤     |
| b) I talk with my friends ..... | ●         | ②                    | ③                     | ④                  | ⑤     |
| c) I play sports .....          | ①         | ●                    | ③                     | ④                  | ⑤     |

**Example 3**

Indicate how much you agree with each of these statements.

Fill in **one** circle for each line

	Agree a lot	Agree a little	Disagree a little	Disagree a lot
a) Watching movies is fun .....	①	●	③	④
b) I like eating ice cream .....	●	②	③	④

Read each question carefully, and pick the answer you think is best. Fill in the circle next to or below your answer. If you decide to change your answer, erase your first answer and then fill in the circle next to or under your new answer. Ask for help if you do not understand something or are not sure how to answer.

Thank you for your time, effort, and thought in completing this questionnaire.

## **General Directions**

Your school has agreed to participate in TIMSS 2003, a large international study of student learning in mathematics and science in more than 50 countries around the world. Sponsored by the International Association for the Evaluation of Educational Achievement (IEA), TIMSS (for Trends in International Mathematics and Science Study) is measuring trends in student achievement and studying differences in national education systems in order to help improve the teaching and learning of mathematics and science worldwide.

As part of the study, students in a nationwide sample of <eighth-grade> classes in <country> will complete the TIMSS mathematics and science tests. This questionnaire is addressed to teachers who teach mathematics to these students, and seeks information about teachers' academic and professional background, instructional practices, and attitudes toward teaching mathematics. As a teacher of mathematics to students in one of these sampled classes, your responses to these questions are very important in helping to describe mathematics education in <country>.

Some of the questions in this questionnaire refer specifically to students in the "TIMSS class." This is the class that is identified on the cover of this questionnaire, and that will be tested as part of TIMSS 2003 in your school. It is important that you answer each question carefully so that the information that you provide reflects your situation as accurately as possible.

Please identify a time and place where you will be able to complete this questionnaire without being interrupted. This should require no more than 45 minutes. To make it as easy as possible for you to respond, most questions may be answered simply by checking or filling the appropriate circle.

Once you have completed the questionnaire, place it in the return envelope provided and return it to: <Country Specific Information>

Thank you very much for the time and effort you have put into responding to this questionnaire.

## General Directions

Your school has agreed to participate in TIMSS 2003, a large international study of student learning in mathematics and science in more than 50 countries around the world. Sponsored by the International Association for the Evaluation of Educational Achievement (IEA), TIMSS (for Trends in International Mathematics and Science Study) is measuring trends in student achievement and studying differences in national education systems in order to help improve the teaching and learning of mathematics and science worldwide.

As part of the study, students in a nationwide sample of <eighth-grade> classes in <country> will complete the TIMSS mathematics and science tests. This questionnaire is addressed to teachers who teach science to these students, and seeks information about teachers' academic and professional background, instructional practices, and attitudes toward teaching science. As a teacher of science to students in one of these sampled classes, your responses to these questions are very important in helping to describe science education in <country>.

Some of the questions in this questionnaire refer specifically to students in the "TIMSS class." This is the class that is identified on the cover of this questionnaire, and that will be tested as part of TIMSS 2003 in your school. If you teach science to some but not all of the students in the TIMSS class, please think of teaching the science class these students are in when answering these class-specific questions. It is important that you answer each question carefully so that the information that you provide reflects your situation as accurately as possible.

Please identify a time and place where you will be able to complete this questionnaire without being interrupted. This should require no more than 45 minutes. To make it as easy as possible for you to respond, most questions may be answered simply by checking or filling the appropriate circle.

Once you have completed the questionnaire, place it in the return envelope provided and return it to: <Country Specific Information>

Thank you very much for the time and effort you have put into responding to this questionnaire.

## **General Directions**

Your school has agreed to participate in TIMSS 2003, a large international study of student learning in mathematics and science in more than 50 countries around the world. Sponsored by the International Association for the Evaluation of Educational Achievement (IEA), TIMSS (for Trends in International Mathematics and Science Study) is measuring trends in student achievement and studying differences in national education systems in order to help improve the teaching and learning of mathematics and science worldwide.

This questionnaire is addressed to school principals and department heads who are asked to supply information about their schools. Since your school has been selected as part of a nationwide sample, your responses are very important in helping to describe the school system in <country>.

It is important that you answer each question carefully so that the information provided reflects the situation in your school as accurately as possible. Some of the questions will require that you look up school records, so you may wish to arrange for the assistance of another staff member to help provide this information.

Please identify a time and place where you will be able to complete this questionnaire without being interrupted. This should require no more than 30 minutes. To make it as easy as possible for you to respond, most questions may be answered simply by filling in the appropriate circle.

Once you have completed the questionnaire, place it in the return envelope provided and return it to: <Country Specific Information>

Thank you very much for the time and effort you have put into responding to this questionnaire.

### The School Characteristics

<Some of the questions in this questionnaire ask about your school in general. If your school has a wide range of grades, please try to answer such questions with regard to the <junior secondary / middle school / basic> grades.>

**Main Survey**

**Curriculum  
Questionnaire**

Mathematics  
<Grade 8>

## **General Directions**

This questionnaire is addressed to National Research Coordinators, who are asked to supply information about their nation's intended curriculum in mathematics. This will help provide background information for interpretation of the school and achievement data collected in other parts of the TIMSS 2003 study. Your responses are very important in helping to provide a better understanding of the study results.

We ask that you or your nominee complete this questionnaire, working with others as necessary (e.g., curriculum supervisors of mathematics representative of those at the <grade 8> level in your country). It is important that you answer each question carefully and provide additional information where requested so that as accurate a picture as possible of your country's curriculum is presented in the final reports.

●Your cooperation in completing this questionnaire is greatly appreciated●

## National Curriculum

**IMPORTANT:** Throughout this questionnaire, the term “national curriculum” is intended to include any centrally-supported curriculum. The curriculum need not be mandated but it should be strongly recommended or at least widely used.

This curriculum may not necessarily be articulated in a formal document, or different aspects of the curriculum may appear in different documents.

**Curriculum  
Questionnaire**

Science  
<Grade 8>

## **General Directions**

This questionnaire is addressed to National Research Coordinators, who are asked to supply information about their nation's intended curriculum in science. This will help provide background information for interpretation of the school and achievement data collected in other parts of the TIMSS 2003 study. Your responses are very important in helping to provide a better understanding of the study results.

We ask that you or your nominee complete this questionnaire, working with others as necessary (e.g., curriculum supervisors of science representative of those at the <grade 8> level in your country). It is important that you answer each question carefully and provide additional information where requested so that as accurate a picture as possible of your country's curriculum is presented in the final reports.

●Your cooperation in completing this questionnaire is greatly appreciated●

### National Curriculum

**IMPORTANT:** Throughout this questionnaire, the term "national curriculum" is intended to include any centrally-supported curriculum. The curriculum need not be mandated but it should be strongly recommended or at least widely used.

This curriculum may not necessarily be articulated in a formal document, or different aspects of the curriculum may appear in different documents.

## General Directions

In this booklet, you will find questions about yourself. Some questions ask for facts while other questions ask for your opinions.

Read each question carefully and answer as accurately as possible. You may ask for help if you do not understand something or are not sure how to answer.

Some of the questions will be followed by a few possible choices indicated with a circle with a number in it. For these questions, shade in the circle with the answer of your choice as shown in Examples 1, 2, and 3.

### Example 1

Do you go to school?

Fill in **one** circle only

Yes ..... ●

No ..... ②

### Example 2

How often do you do these things?

Fill in **one** circle for each line

- |                                 | Every day | At least once a week | Once or twice a month | A few times a year | Never |
|---------------------------------|-----------|----------------------|-----------------------|--------------------|-------|
| a) I listen to music .....      | ↓         | ↓                    | ↓                     | ↓                  | ↓     |
|                                 | ①         | ②                    | ●                     | ④                  | ⑤     |
| b) I talk with my friends ..... | ●         | ②                    | ③                     | ④                  | ⑤     |
| c) I play sports .....          | ①         | ●                    | ③                     | ④                  | ⑤     |

**Example 3**

Indicate how much you agree with each of these statements.

Fill in **one** circle for each line

	Agree a lot	Agree a little	Disagree a little	Disagree a lot
a) Watching movies is fun .....	①	●	③	④
b) I like eating ice cream .....	●	②	③	④

Read each question carefully, and pick the answer you think is best. Fill in the circle next to or below your answer. If you decide to change your answer, erase your first answer and then fill in the circle next to or under your new answer. Ask for help if you do not understand something or are not sure how to answer.

Thank you for your time, effort, and thought in completing this questionnaire.

# General Directions

Your school has agreed to participate in TIMSS 2003, a large international study of student learning in mathematics and science in more than 50 countries around the world. Sponsored by the International Association for the Evaluation of Educational Achievement (IEA), TIMSS (for Trends in International Mathematics and Science Study) is measuring trends in student achievement and studying differences in national education systems in order to help improve the teaching and learning of mathematics and science worldwide.

As part of the study, students in a nationwide sample of <fourth-grade> classes in <country> will complete the TIMSS mathematics and science tests. This questionnaire is addressed to teachers who teach mathematics and science to these students, and seeks information about teachers' academic and professional background, instructional practices, and attitudes toward teaching mathematics and science. As a teacher of the students in one of these sampled classes, your responses to these questions are very important in helping to describe mathematics and science education in <country>.

Some of the questions in this questionnaire refer specifically to students in the "TIMSS class." This is the class that is identified on the cover of this questionnaire, and that will be tested as part of TIMSS 2003 in your school. If you teach some but not all of the students in the TIMSS class, please think only of the students that you teach when answering these class-specific questions. It is important that you answer each question carefully so that the information that you provide reflects your situation as accurately as possible.

Please identify a time and place where you will be able to complete this questionnaire without being interrupted. This should require no more than 45 minutes. To make it as easy as possible for you to respond, most questions may be answered simply by checking or filling the appropriate circle.

Once you have completed the questionnaire, place it in the return envelope provided and return it to: <Country Specific Information>

Thank you very much for the time and effort you have put into responding to this questionnaire.

## General Directions

Your school has agreed to participate in TIMSS 2003, a large international study of student learning in mathematics and science in more than 50 countries around the world. Sponsored by the International Association for the Evaluation of Educational Achievement (IEA), TIMSS (for Trends in International Mathematics and Science Study) is measuring trends in student achievement and studying differences in national education systems in order to help improve the teaching and learning of mathematics and science worldwide.

This questionnaire is addressed to school principals and department heads who are asked to supply information about their schools. Since your school has been selected as part of a nationwide sample, your responses are very important in helping to describe the school system in <country>.

It is important that you answer each question carefully so that the information provided reflects the situation in your school as accurately as possible. Some of the questions will require that you look up school records, so you may wish to arrange for the assistance of another staff member to help provide this information.

Please identify a time and place where you will be able to complete this questionnaire without being interrupted. This should require no more than 30 minutes. To make it as easy as possible for you to respond, most questions may be answered simply by filling in the appropriate circle.

Once you have completed the questionnaire, place it in the return envelope provided and return it to: <Country Specific Information>

Thank you very much for the time and effort you have put into responding to this questionnaire.

**The School Characteristics**

<Some of the questions in this questionnaire ask about your school in general. If your school has a wide range of grades, please try to answer such questions with regard to the primary grades.>

**Fourth Grade – Mathematics Curriculum  
Questionnaire (CQM1)**

### General Directions

This questionnaire is addressed to National Research Coordinators, who are asked to supply information about their nation's intended curriculum in mathematics. This will help provide background information for interpretation of the school and achievement data collected in other parts of the TIMSS 2003 study. Your responses are very important in helping to provide a better understanding of the study results.

We ask that you or your nominee complete this questionnaire, working with others as necessary (e.g., curriculum supervisors of mathematics representative of those at the <grade 4> level in your country). It is important that you answer each question carefully and provide additional information where requested so that as accurate a picture as possible of your country's curriculum is presented in the final reports.

●Your cooperation in completing this questionnaire is greatly appreciated●

### National Curriculum

**IMPORTANT:** Throughout this questionnaire, the term "national curriculum" is intended to include any centrally-supported curriculum. The curriculum need not be mandated but it should be strongly recommended or at least widely used.

This curriculum may not necessarily be articulated in a formal document, or different aspects of the curriculum may appear in different documents.

## Grade 4 Mathematics Topics

### 12

According to the national mathematics curriculum, what proportion of <grade 4> students should have been taught each of the following topics or skills by the end of <grade 4>?

Across grades K-12, at what grade(s) are the topics primarily intended to be taught?

Be sure to include curriculum expectations for all grades up to and including <grade 4>. If there are not any specifications to this detail, please indicate national expectations to the best of your ability.

If part of a topic does not apply (e.g., location on a number line in topic (f) below), please cross out that part and answer for the major part of the topic.

### General Directions

This questionnaire is addressed to National Research Coordinators, who are asked to supply information about their nation’s intended curriculum in science. This will help provide background information for interpretation of the school and achievement data collected in other parts of the TIMSS 2003 study. Your responses are very important in helping to provide a better understanding of the study results.

We ask that you or your nominee complete this questionnaire, working with others as necessary (e.g., curriculum supervisors of science representative of those at the <grade 4> level in your country). It is important that you answer each question carefully and provide additional information where requested so that as accurate a picture as possible of your country’s curriculum is presented in the final reports.

●Your cooperation in completing this questionnaire is greatly appreciated●

## National Curriculum

**IMPORTANT:** Throughout this questionnaire, the term “national curriculum” is intended to include any centrally-supported curriculum. The curriculum need not be mandated but it should be strongly recommended or at least widely used.

This curriculum may not necessarily be articulated in a formal document, or different aspects of the curriculum may appear in different documents.

According to the national science curriculum, what proportion of <grade 4> students should have been taught each of the following topics or skills by the end of <grade 4>?

Across grades K-12, at what grade(s) are the topics primarily intended to be taught?

Be sure to include curriculum expectations for all grades up to and including <grade 4>. If there are not any specifications to this detail, please indicate national expectations to the best of your ability.

If part of a topic does not apply, please cross out that part and answer for the major part of the topic.
